Disclosure: The performance data quoted here represents past performance. Current performance may be lower or higher than the performance data quoted above. Past performance is no guarantee of future results. The investment return and principal value of an investment will fluctuate so that investor's shares, when redeemed, may be worth more or less than their original cost. The Fund's investment adviser has contractually agreed to reduce its fees and/or absorb expenses of the Fund, at least until March 1, 2017, to ensure that the net annual fund operating expenses will not exceed 1.25% attributable to Class Y shares, subject to possible recoupment from the Fund in future years. Without these waivers, the Fund's total annual operating expenses would be 2.28% for Class Y Shares. Please review the fund's prospectus for more information regarding the fund's fees and expenses. For performance information current to the most recent month-end, please call toll-free 844-467-2459.

© 2018 Morningstar. All Rights Reserved. The information contained herein: (1) is proprietary to Morningstar and/or its content providers; (2) may not be copied or distributed; and (3) is not warranted to be accurate, complete or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. Past performance is no guarantee of future results. The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The Morningstar Rating does not include any adjustment for sales loads. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. Past performance or ranking is not indicative of future results.

Performance Date - February 28, 2018

Holdings Date - January 31, 2017

The Objective

The Conductor Global Equity Value Fund is a process-focused strategy seeking to produce superior long-term risk-adjusted returns for clients by investing in 50-100 global mid to large cap equities exhibiting superior fundamental attributes. The Fund incorporates a relative strength based technical analysis into the analytical process to complement the fundamental framework and enhance overall performance. Furthermore, Conductor Global purchases the international equities in the native foreign country and the native foreign currency providing an added layer of diversification: sector, geography, and currency.

Management

CHARLES CUNNINGHAM III, CFA

Chief Investment Officer, Co-Founder
B.A. University of the South
M.B.A. Vanderbilt University

A CFA Charterholder, he spent over 20 years in investment management roles with Morgan Stanley, Morgan Keegan, Galleon Group, among others. Chad combines his multiple experiences into a broad and deep understanding of securities, the markets, and risk.

Disclosure: Any returns presented include dividends reinvested and investing in the Fund carries certain risks. Adverse changes in currency exchange rates may erode or reverse any potential gains from the Fund's investments. The risk of investing in emerging market securities, primarily increased foreign investment risk. Investments in foreign securities could subject the Fund to greater risks including, currency fluctuation, economic conditions, and different governmental and accounting standards. There is a risk that issuers and counterparties will not make payments on securities and other investments held by the Fund, resulting in losses to the Fund. Investments in lesser-known, small and medium capitalization companies may be more vulnerable than larger, more established organizations. There can be a higher portfolio turnover due to active and frequent trading that may result in higher transactional and brokerage costs. The Adviser from time to time employs various hedging techniques. The success of the Fund's hedging strategy will be subject to the Adviser's ability to correctly assess the degree of correlation between the performance of the instruments used in the hedging strategy and the performance of the investments in the portfolio being hedged. The risk on a short sale is the risk of loss if the value of a security sold short increases prior to the delivery date, since the Fund must pay more for the security than it received from the purchaser in the short sale. Therefore, the risk of loss may be unlimited.

Investors should carefully consider the investment objectives, risks, charges and expenses of the Conductor Funds.
