## FUND SUMMARY

**Investment Objective:** The Conductor Global Equity Value Fund (*formerly called the Conductor Global Fund*) (the “Fund”) seeks to provide long-term risk-adjusted total return.

**Fees and Expenses of the Fund:** This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund. You may qualify for sales charge discounts on purchases of Class A shares if you and your family invest, or agree to invest in the future, at least \$25,000 in the Fund. More information about these and other discounts is available from your financial professional and the section entitled **How to Purchase Shares** in this Prospectus.

<b>Shareholder Fees (fees paid directly from your investment)</b>	<b>Class A</b>	<b>Class C</b>	<b>Class I</b>
Maximum Sales Charge (Load) Imposed on Purchases (as a % of offering price)	5.75%	None	None
Maximum Deferred Sales Charge (Load) (as a % of original purchase price)	None <sup>(1)</sup>	None <sup>(1)</sup>	None
Redemption Fee (as a % of amount redeemed within 30 days of purchase)	1.00%	1.00%	1.00%
<b>Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)</b>			
Management Fees	1.25%	1.25%	1.25%
Distribution and Service (12b-1) Fees	0.25%	1.00%	None
Other Expenses	0.66%	0.66%	0.66%
Acquired Fund Fees and Expenses <sup>(1)</sup>	<u>0.04%</u>	<u>0.04%</u>	<u>0.04%</u>
Total Annual Fund Operating Expenses	2.20%	2.95%	1.95%
Expense Waiver <sup>(2)</sup>	<u>(0.01)%</u>	<u>(0.01)%</u>	<u>(0.01)%</u>
Total Annual Fund Operating Expenses After Expense Waiver	2.19%	2.94%	1.94%

- (1) Class A shares and Class C shares purchased prior to February 28, 2017 that are redeemed within the first 18 months and 12 months of purchase, respectively, may be subject to a contingent deferred sales charge.
- (2) Acquired Fund Fees and Expenses are the indirect costs of investing in other investment companies. The operating expenses in this fee table will not correlate to the expense ratio in the Fund’s financial highlights because the financial statements include only the direct operating expenses incurred by the Fund.
- (3) The Fund’s adviser has contractually agreed to reduce the Fund’s fees and/or absorb expenses of the Fund until at least March 1, 2018 to ensure that total annual Fund operating expenses (exclusive of any front-end or contingent deferred loads; brokerage fees and commissions; expenses of other investment companies in which the Fund may invest (“acquired fund fees and expenses”); borrowing costs, such as interest and dividend expense on securities sold short; taxes; and extraordinary expenses, such as litigation expenses) do not exceed 2.15%, 2.90% and 1.90% of average daily net assets attributable to Class A, Class C and Class I shares, respectively. This agreement may be terminated by the Fund’s Board of Trustees on 60 days’ written notice to the adviser. These expense reimbursements are subject to possible recoupment from the Fund in future years on a rolling three year basis (within the three years after the fees have been waived or reimbursed) if such recoupment can be achieved within the foregoing expense limits.

**Example:** This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds.

The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based upon these assumptions your costs would be:

	<b>1 Year</b>	<b>3 Years</b>	<b>5 Years</b>	<b>10 Years</b>
<b>Class A</b>	\$784	\$1,223	\$1,686	\$2,962
<b>Class C</b>	\$297	\$912	\$1,552	\$3,270
<b>Class I</b>	\$197	\$611	\$1,051	\$2,274

**Portfolio Turnover:** The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund’s performance. For the fiscal year ended October 31, 2016, the Fund’s portfolio turnover rate was 123% of the average value of its portfolio.

**Principal Investment Strategies:** The Fund normally invests at least 80% of its assets in equity securities or investments that are economically tied to equity securities. The Fund seeks to achieve its investment objective by investing under normal circumstances in a portfolio of equity securities of companies that are believed to exhibit strong fundamental attributes. The Fund’s investment adviser, IronHorse Capital LLC (“IronHorse” or the “Adviser”), develops the composition of the Fund’s portfolio using technical, fundamental and quantitative analysis to select equity securities that meet specific value-oriented criteria. The Fund’s investment in shares of other investment companies, including exchange-traded funds (“ETFs”), and derivative instruments will be counted toward the 80% policy discussed above to the extent such investments have economic characteristics similar to equity securities.

The Adviser employs a fundamentals-based quantitative factor model to attempt to identify investments that are undervalued by the market in comparison to the Adviser’s assessment of the investments’ intrinsic value. The model relies upon fundamental metrics which include, but are not limited to: cash flow generation, profitability and balance sheet metrics. Once investment opportunities meeting these fundamental criteria are identified, the Adviser employs a technical model to measure relative price trends. The technical model evaluates the momentum, pricing behavior and chart patterns of each security to trigger buy and sell decisions. No individual securities will be purchased unless all specific fundamental and technical criteria are satisfied. The Adviser will generally sell an investment whose price the Adviser believes is no longer undervalued by the market in comparison to the Adviser’s assessment of the investments’ intrinsic value, as a result of a material change in the business of the issuer or a material appreciation in the price of the security, or if the Adviser believes that a more attractive investment opportunity becomes available.

The Fund seeks to invest under normal circumstances in equity securities that are economically tied to at least three countries (one of which may be the United States). Under normal circumstances, the Fund invests at least 40% of its assets in issuers located outside the United States, unless market conditions are not deemed favorable by the Adviser, in which case the Fund would invest at least 30% of its assets in issuers located outside the United States. Equity securities in which the Fund may invest include common stocks and equity-equivalent securities or derivatives whose values are based on common stocks, such as options (stock or stock index), futures contracts (stock or stock index) and index swaps. The Fund may invest without limit in U.S. and non-U.S. dollar-denominated securities of U.S. and foreign (non-U.S.) issuers. The Fund may invest in common stocks of large-cap companies, as well as small and mid-cap companies. The Adviser typically purchases stocks on host exchanges of a company’s respective country of domicile, allowing the Fund to benefit from pure currency diversification.

The Fund prioritizes managing risk exposures. When the Adviser’s macro analysis indicates that market risks have risen, the Fund may employ hedges such as cash, ETFs, or simple index options to preserve portfolio returns. If employed, index derivatives will represent only a portion of the Fund’s expected investments. The Fund may also engage in short sales of equity index ETFs and similar instruments to manage risk. The Fund’s typical net exposure as a percentage of the Fund’s assets will range from 50% net long to 100% net long. The Fund may engage in active trading of portfolio securities to achieve its investment goal.

**Principal Investment Risks:** As with all mutual funds, there is the risk that you could lose money through your investment in the Fund. The Fund is not intended to be a complete investment program but rather one component of a diversified investment portfolio. Many factors affect the Fund’s net asset value and performance.

- *Active Trading Risk.* A higher portfolio turnover due to active and frequent trading may result in higher transactional and brokerage costs.
- *Credit Risk.* The risk that the Fund could lose money if the issuer or guarantor of a fixed income security is unwilling or unable to make timely payments to meet its contractual obligations.
- *Currency Risk.* The risk that foreign (non-U.S.) currencies will decline in value relative to the U.S. dollar and adversely affect the value of the Fund’s investments in foreign (non-U.S.) currencies or in securities that trade in, and receive revenues in, or in derivatives that provide exposure to, foreign (non-U.S.) currencies.
- *Cybersecurity Risk.* There is risk to the Fund of an unauthorized breach and access to fund assets, customer data (including private shareholder information), or proprietary information, or the risk of an incident occurring that causes the Fund, the investment adviser, custodian, transfer agent, distributor and other service providers and financial intermediaries to suffer data breaches, data corruption or lose operational functionality. Successful cyber-attacks or other cyber-failures or events affecting the Fund or its service providers may adversely impact the Fund or its shareholders.
- *Derivatives Risk.* The derivative instruments in which the Fund may invest, either directly or through an underlying fund, may be more volatile than other instruments. The risks associated with investments in derivatives also include liquidity, interest rate, market, credit and management risks, mispricing or improper valuation. Changes in the market value of a derivative may not correlate perfectly with the underlying asset, rate or index, and the Fund could lose more than the principal amount invested. In addition, if a derivative is being used for hedging purposes there can be no assurance given that each derivative position will achieve a perfect correlation with the security or currency against which it is being hedged, or that a particular derivative position will be available when sought by the portfolio manager.
- *Equity Risk.* Common stocks are susceptible to general stock market fluctuations and to volatile increases and decreases in value as market confidence in and perceptions of their issuers change. Preferred stocks are subject to the risk that the dividend on the stock may be changed or omitted by the issuer, and that participation in the growth of an issuer may be limited.

- *Emerging Market Risk.* Emerging markets are riskier than more developed markets because they tend to develop unevenly and may never fully develop. Investments in emerging markets may be considered speculative. Emerging markets are more likely to experience hyperinflation and currency devaluations, which adversely affect returns to U.S. investors. In addition, many emerging financial markets have far lower trading volumes and less liquidity than developed markets.
- *Foreign (Non-U.S.) Investment Risk.* Foreign (non-U.S.) securities present greater investment risks than investing in the securities of U.S. issuers and may experience more rapid and extreme changes in value than the securities of U.S. companies, due to less information about foreign (non-U.S.) companies in the form of reports and ratings than about U.S. issuers; different accounting, auditing and financial reporting requirements; smaller markets; nationalization; expropriation or confiscatory taxation; currency blockage; or political changes or diplomatic developments. Foreign (non-U.S.) securities may also be less liquid and more difficult to value than securities of U.S. issuers.
- *Hedging Transactions Risk.* The Adviser from time to time employs various hedging techniques. The success of the Fund's hedging strategy will be subject to the Adviser's ability to correctly assess the degree of correlation between the performance of the instruments used in the hedging strategy and the performance of the investments in the portfolio being hedged. Because the characteristics of many securities change as markets change or time passes, the success of the Fund's hedging strategy will also be subject to the Adviser's ability to continually recalculate, readjust, and execute hedges in an efficient and timely manner. For a variety of reasons, the Adviser may not seek to establish a perfect correlation between such hedging instruments and the portfolio holdings being hedged. Such imperfect correlation may prevent the Fund from achieving the intended hedge or expose the Fund to risk of loss. In addition, it is not possible to hedge fully or perfectly against any risk, and hedging entails its own costs.
- *Index Risk.* If a derivative or ETF is linked to the performance of an index, it will be subject to the risks associated with changes in that index.
- *Investment Companies and Exchange-Traded Funds ("ETFs") Risk.* When the Fund invests in other investment companies, including ETFs, it will bear additional expenses based on its pro rata share of the other investment company's or ETF's operating expenses, including the potential duplication of management fees. The risk of owning an ETF generally reflects the risks of owning the underlying investments the ETF holds. The Fund also will incur brokerage costs when it purchases and sells ETFs.
- *Issuer-Specific Risk.* The value of a specific security can be more volatile than the market as a whole and may perform worse than the market as a whole.
- *Management Risk.* The risk that investment strategies employed by the Adviser in selecting investments for the Fund may not result in an increase in the value of your investment or in overall performance equal to other similar investment vehicles having similar investment strategies.
- *Market Risk.* Overall equity market risk may affect the value of individual instruments in which the Fund invests. Factors such as domestic and foreign (non-U.S.) economic growth and market conditions, interest rate levels, and political events affect the securities markets. When the value of the Fund's investments goes down, your investment in the Fund decreases in value and you could lose money.
- *Market Events Risk.* There has been increased volatility, depressed valuations, decreased liquidity and heightened uncertainty in the financial markets during the past several years. These conditions may continue, recur, worsen or spread. The U.S. government and the Federal Reserve, as well as certain foreign governments and central banks, have taken steps to support financial markets, including by keeping interest rates at historically low levels. This and other government intervention may not work as intended, particularly if the efforts are perceived by investors as being unlikely to achieve the desired results. The U.S. government and the Federal Reserve have recently reduced market support activities. Further reduction, including interest rate increases, could negatively affect financial markets generally, increase market volatility and reduce the value and liquidity of securities in which the Fund invests. Policy and legislative changes in the United States and in other countries may also continue to contribute to decreased liquidity and increased volatility in the financial markets. The impact of these changes on the markets, and the practical implications for market participants, may not be fully known for some time.
- *Model Risk.* The Fund will use model-based strategies that may result in a decline in the value of the Fund's shares. In addition, the model may not adequately take into account certain factors, the data used in the model may be inaccurate, or the computer programming used to create the model might contain one or more errors.
- *Portfolio Turnover Risk.* The Fund may experience high portfolio turnover, including investments made on a shorter-term basis, which may lead to increased Fund expenses that may result in lower investment returns. High portfolio turnover may also result in higher short-term capital gains taxable to shareholders.
- *Securities Lending Risk.* The Fund may lend portfolio securities to institutions, such as banks and certain broker-dealers. The Fund may experience a loss or delay in the recovery of its securities if the borrowing institution breaches its agreement with the Fund.
- *Short Selling Risk.* The risk on a short sale is the risk of loss if the value of a security sold short increases prior to the delivery date, since the Fund must pay more for the security than it received from the purchaser in the short sale. Therefore, the risk of loss may be unlimited.
- *Small-Cap and Mid-Cap Risk.* The risk that the value of securities issued by small-capitalization and mid-capitalization companies may be more vulnerable than larger, more established organizations to adverse business or economic developments.

- *Value Investing Risk.* Value investing attempts to identify securities selling at a discount in comparison to the Adviser's assessments of their intrinsic value. Such securities may not increase in price as anticipated by the Adviser, and may even decline further in value if other investors fail to recognize the issuer's value or if the events or factors that the Adviser believes will increase a security's market value do not occur.
- *Valuation Risk.* The sale price that the Fund could receive for a portfolio security may differ from the Fund's valuation of the security, particularly for securities that trade in low volume or volatile markets or that are valued using a fair value methodology. In addition, the value of the securities in the Fund's portfolio may change on days when shareholders will not be able to purchase or sell the Fund's shares.

**Performance:** The bar chart and performance table below show the variability of the Fund's returns, which is some indication of the risks of investing in the Fund. The bar chart shows performance of the Fund's Class I shares for each calendar year since the Fund's inception. The performance table compares the performance of the Fund's Class I shares over time to the performance of a broad-based market index. Returns for Class A and Class C shares, which are not presented, will vary from the returns of Class I shares. Class A and Class C shares are invested in the same portfolio of securities and the annual returns differ only to the extent that the Classes do not have the same expenses. You should be aware of the Fund's past performance (before and after taxes) may not be an indication of how the Fund will perform in the future. Updated performance information is available at no cost by visiting [www.conductorfunds.com](http://www.conductorfunds.com) or by calling 1-844-GO-RAILX (1-844-467-2459).

**Performance Bar Chart for the Calendar Year Ended December 31st:**

Highest Quarter: 09/30/2016 6.39%  
 Lowest Quarter: 09/30/2015 -8.72%

**Performance Table  
 Average Annual Total Returns  
 (For the year ended December 31, 2016)**

<b>Class I Shares</b>	<b>One Year</b>	<b>Since Inception<sup>(1)</sup></b>
Return before taxes	12.67%	4.11%
Return after taxes on Distributions	12.67%	4.11%
Return after taxes on Distributions and Sale of Fund Shares	7.17%	3.16%
<b>Class A Shares</b>		
Return before taxes	5.94%	3.09%
<b>Class C Shares</b>		
Return before taxes	10.62%	9.25%
<b>MSCI World Total Return Index<sup>(2)</sup></b> (reflects no deduction for fees, expenses or taxes)	8.15%	4.52%

- (1) The Fund's Class I shares commenced operations on December 27, 2013. The Fund's Class A shares commenced operations on April 15, 2014. The Fund's Class C shares commenced operations on September 17, 2015. Since Inception returns for the MSCI World Total Return Index are for the period beginning December 27, 2013.
- (2) The MSCI World Total Return Index is a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed markets. The MSCI World Index consists of 23 developed market country indexes. Investors cannot invest directly in an index or benchmark.

After-tax returns are shown for Class I shares only, and after-tax returns for other classes will vary. After-tax returns were calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown, and after-tax returns shown are not relevant to investors who hold shares of the Fund through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts.

**Investment Adviser:** IronHorse Capital LLC serves as investment adviser to the Fund.

**Portfolio Manager:** The Fund is managed by Charles Albert Cunningham, III, CFA, Chief Investment Officer and investment committee member of IronHorse. Mr. Cunningham has managed the Fund since its inception in 2013.

**Purchase and Sale of Fund Shares:** You may purchase and redeem shares of the Fund on any day that the New York Stock Exchange is open for trading by written request, by telephone at 1-844-GO-RAILX (1-844-467-2459), or through your broker. Redemptions will be paid by automated clearing house funds (“ACH”), check or wire transfer. The Fund or its Adviser may waive any of the minimum initial and subsequent investment amounts.

Class	Minimum Investment	
	Initial	Subsequent
A	\$2,500	\$500
C	\$2,500	\$500
I	\$100,000	\$1,000

**Tax Information:** Dividends and capital gain distributions you receive from the Fund, whether you reinvest your distributions in additional Fund shares or receive them in cash, are taxable to you at either ordinary income or capital gains tax rates unless you are investing through a tax-deferred plan such as an IRA or 401(k) plan.

**Payments to Broker-Dealers and Other Financial Intermediaries:** If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies, including the Adviser, may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.

## **ADDITIONAL INFORMATION ABOUT PRINCIPAL INVESTMENT STRATEGIES AND RELATED RISKS**

**Investment Objective:** The Fund seeks to provide long-term risk-adjusted total return. The Fund’s investment objective may be changed by the Fund’s Board of Trustees upon 60 days’ prior written notice to shareholders.

**Principal Investment Strategies:** The Fund normally invests at least 80% of its assets in equity securities or investments that are economically tied to equity securities. The Fund seeks to achieve its investment objective by investing under normal circumstances in a portfolio of equity securities exhibiting superior fundamental attributes. The Fund’s Adviser develops the composition of the Fund’s portfolio using technical, fundamental and quantitative analysis to select equity securities that meet specific value-oriented criteria. The Fund’s investment in shares of other investment companies, including ETFs, and derivative instruments will be counted toward the 80% policy discussed above to the extent such investments have economic characteristics similar to equity securities.

The Adviser employs a fundamentals-based quantitative factor model to attempt to identify investments that are undervalued by the market in comparison to the Adviser’s assessment of the investments’ intrinsic value. The model relies upon fundamental metrics which include, but are not limited to: cash flow generation, profitability and balance sheet metrics. Once investment opportunities meeting these fundamental criteria are identified, the Adviser employs a technical model to measure relative price trends. The technical model evaluates the momentum, pricing behavior and chart patterns of each security to trigger buy and sell decisions. No individual securities will be purchased unless all specific fundamental and technical criteria are satisfied. The Adviser will generally sell an investment whose price the Adviser believes is no longer undervalued by the market in comparison to the Adviser’s assessment of the investments’ intrinsic value, as a result of a material change in the business of the issuer or a material appreciation in the price of the security, or if the Adviser believes that a more attractive investment opportunity becomes available.

The Fund seeks to invest under normal circumstances in equity securities that are economically tied to at least three countries (one of which may be the United States). Under normal circumstances, the Fund invests at least 40% of its assets in issuers located outside the United States, unless market conditions are not deemed favorable by the Fund’s Adviser, in which case the Fund would invest at least 30% of its assets in issuers located outside the United States. Equity securities in which the Fund may invest include common stocks and equity-equivalent securities or derivatives whose values are based on common stocks, such as options (stock or stock index), futures contracts (stock or stock index) and index swaps. The Fund may invest without limit in U.S. and non-U.S. dollar-denominated securities of U.S. and foreign (non-U.S.) issuers. The Fund may invest in common stocks of large-cap companies, as well as small and mid-cap companies. The Adviser typically purchases stocks on host exchanges of a company’s respective country of domicile, allowing the Fund to benefit from pure currency diversification.

The Fund prioritizes managing risk exposures. When the Adviser’s macro analysis indicates that market risks have risen, the Fund may employ hedges such as cash, ETFs, or simple index options to preserve portfolio returns. If employed, index derivatives will represent only a portion of the Fund’s expected investments. The Fund may also engage in short sales of equity index ETFs and similar instruments to manage risk. The Fund’s typical net exposure as a percentage of the Fund’s assets will range from 50% net long to 100% net long. The Fund may engage in active trading of portfolio securities to achieve its investment goal.

In response to adverse market, economic, political or other conditions, the Fund may invest up to 100% of its total assets, without limitation, in high-quality short-term debt securities, money market instruments and cash. These short-term debt securities and money market instruments include: shares of money market mutual funds, commercial paper, certificates of deposit, bankers' acceptances, U.S. Government securities and repurchase agreements. While the Fund is in a defensive position, the opportunity to achieve upside return may be limited; however, the ability to be fully defensive is an integral part of achieving the Fund's investment objective.

#### **Principal Risk Factors:**

- *Active Trading Risk.* A higher portfolio turnover may result in higher transactional and brokerage costs associated with the turnover which may reduce the Fund's return, unless the instruments traded can be bought and sold without corresponding commission costs. Active trading of instruments may also increase the Fund's realized capital gains or losses, which may affect the taxes you pay as a Fund shareholder.
- *Credit Risk.* The risk that issuers or guarantors of a fixed income security cannot or will not make payments on the securities and other investments held by the Fund, resulting in losses to the Fund. In addition, the credit quality of securities held by the Fund may be lowered if an issuer's financial condition changes, which may lower their value and may affect their liquidity.
- *Currency Risk.* The risk that foreign (non-U.S.) currencies will decline in value relative to the U.S. dollar and adversely affect the value of the Fund's investments in foreign (non-U.S.) currencies or in securities that trade in, and receive revenues in, or in derivatives that provide exposure to, foreign (non-U.S.) currencies. Currency risk may be particularly high to the extent that the Fund invests in foreign (non-U.S.) currencies or engages in foreign (non-U.S.) currency transactions that are economically tied to emerging market countries.
- *Cybersecurity Risk.* There is risk to a Fund of an unauthorized breach and access to fund assets, customer data (including private shareholder information), or proprietary information, or the risk of an incident occurring that causes a Fund, the investment adviser, custodian, transfer agent, distributor and other service providers and financial intermediaries to suffer data breaches, data corruption or lose operational functionality. Successful cyber-attacks or other cyber-failures or events affecting the Funds or their service providers may adversely impact a Fund or its shareholders.
- *Derivatives Risk.* The Fund may invest, either directly or through an underlying fund, in derivatives, which are financial instruments whose value is typically based on the value of a security, commodity or index. These instruments include options, futures contracts, forward currency contracts, swap agreements, including total return swap agreements, and similar instruments. Derivatives may also include customized baskets or options (which may incorporate other securities directly and also various derivatives including common stock, options, and futures) structured as agreed upon by a counterparty, as well as specially structured types of mortgage- and asset-backed securities whose value is often linked to commercial and residential mortgage portfolios. The Fund's use of derivative instruments involves risks different from, and possibly greater than, the risks associated with investing directly in securities and other more traditional investments, and certain derivatives may create a risk of loss greater than the amount invested.

Investing for hedging purposes or to increase the Fund's return may result in certain additional transaction costs that may reduce the Fund's performance. The Fund may use a variety of currency hedging techniques to attempt to hedge exchange rate risk or gain exposure to a particular currency. When used for hedging purposes, no assurance can be given that each derivative position will achieve a perfect correlation with the security or currency against which it is being hedged. Because the markets for certain derivative instruments are relatively new, suitable derivatives transactions may not be available in all circumstances for risk management or other purposes and there can be no assurance that a particular derivative position will be available when sought by the Adviser or that such techniques will be utilized by the Adviser.

The market value of derivative instruments and securities may be more volatile than that of other instruments, and each type of derivative instrument may have its own special risks, including the risk of mispricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates, and indices. Many derivatives, in particular privately negotiated derivatives, are complex and often valued subjectively. Improper valuations can result in increased cash payment requirements to counterparties or a loss of value to the Fund. The value of derivatives may not correlate perfectly, or at all, with the value of the assets, reference rates or indices they are designed to closely track.

Derivatives are subject to a number of other risks, including liquidity risk (the possibility that the derivative may be difficult to purchase or sell and the Adviser may be unable to initiate a transaction or liquidate a position at an advantageous time or price), leverage risk (the possibility that adverse changes in the value or level of the underlying asset, reference rate or index can result in loss of an amount substantially greater than the amount invested in the derivative), interest rate risk (some derivatives are more sensitive to interest rate changes and market price fluctuations), and counterparty risk (the risk that a counterparty may be unable to perform according to a contract, and that any deterioration in a counterparty's creditworthiness could adversely affect the instrument). In addition, because derivative products are highly specialized, investment techniques and risk analyses employed with respect to investments in derivatives are different from those associated with stocks and bonds. Finally, the Fund's use of derivatives may cause the Fund to realize higher amounts of short-term capital gains (generally taxed at ordinary income tax rates) than if the Fund had not used such instruments. Derivative instruments are also subject to the risk that the market value of an instrument will change to the detriment of the Fund. If the Adviser inaccurately forecast the values of

securities, currencies or interest rates or other economic factors in using derivatives, the Fund might have been in a better position if it had not entered into the transaction at all. Some strategies involving derivative instruments can reduce the risk of loss, but they can also reduce the opportunity for gain or result in losses by offsetting favorable price movements in other investments held by the Fund. The Fund may also have to buy or sell a security at a disadvantageous time or price because regulations require funds to maintain offsetting positions or asset coverage in connection with certain derivatives transactions.

The Fund's Statement of Additional Information ("SAI") provides a more detailed description of the types of derivative instruments in which the Fund may invest and their associated risks.

- *Emerging Market Risk.* Investing in emerging markets will, among other things, expose the Fund to all the risks described below in the Foreign (non-U.S.) Investment Risk section, and you should review that section carefully. However, there are greater risks involved in investing in emerging market countries and/or their financial markets than there are in more developed countries and/or markets. Generally, economic structures in these countries are less diverse and mature than those in developed countries, and their political systems are less stable. Investments in emerging market countries may be affected by national policies that restrict foreign investment in certain issuers or industries. The small size of their financial markets and low trading volumes can make investments illiquid and more volatile than investments in developed countries and such securities may be subject to abrupt and severe price declines. The Fund may be required to establish special custody or other arrangements before investing. In addition, because the securities settlement procedures are less developed in these countries, the Fund may be required to deliver securities before receiving payment and may also be unable to complete transactions during market disruptions. The possible establishment of exchange controls or freezes on the convertibility of currency might adversely affect an investment in assets traded in foreign markets.
- *Equity Risk.* Common stocks are susceptible to general stock market fluctuations and to volatile increases and decreases in value as market confidence in and perceptions of their issuers change. Preferred stocks are subject to the risk that the dividend on the stock may be changed or omitted by the issuer, and that participation in the growth of an issuer may be limited.
- *Foreign (Non-U.S.) Investment Risk.* Foreign (non-U.S.) securities present greater investment risks than investing in the securities of U.S. issuers and may experience more rapid and extreme changes in value than the securities of U.S. companies, due to less information about foreign (non-U.S.) companies in the form of reports and ratings than about U.S. issuers; different accounting, auditing and financial reporting requirements; smaller markets; nationalization; expropriation or confiscatory taxation; currency blockage; or political changes or diplomatic developments. To the extent that the Fund invests a significant portion of its assets in a specific geographic region, the Fund will generally have more exposure to regional economic risks associated with foreign (non-U.S.) investments. Foreign (non-U.S.) securities may also be less liquid and more difficult to value than securities of U.S. issuers.

Recently, the United Kingdom ("UK") held a referendum election and voters elected to withdraw from the European Union ("EU"). The Fund may be exposed to risks related to the UK's withdrawal from the EU, including volatile trading markets and significant and unpredictable currency fluctuations. Securities issued by companies domiciled in the UK could be subject to changing regulatory and tax regimes. Banking and financial services companies that operate in the UK or EU could be disproportionately impacted by these actions. Greece has recently experienced political pressure to hold a similar referendum election. Further insecurity in EU membership or the abandonment of the euro could exacerbate market and currency volatility and negatively impact the Fund's investments in securities issued by companies located in EU countries or in underlying funds that hold such securities. The potential impact of these actions, especially if they occur in a disorderly fashion, is not clear but could be significant and far-reaching.

- *Hedging Transactions Risk.* The Adviser may employ various hedging techniques. The success of the Fund's hedging strategy will be subject to the Adviser's ability to correctly assess the degree of correlation between the performance of the instruments used in the hedging strategy and the performance of the investments in the portfolio being hedged. Since the characteristics of many securities change as markets change or time passes, the success of the Fund's hedging strategy will also be subject to the Adviser's ability to continually recalculate, readjust, and execute hedges in an efficient and timely manner.

Hedging against a decline in the value of a portfolio position does not eliminate fluctuations in the values of those portfolio positions or prevent losses if the values of those positions decline. Rather, it establishes other positions designed to gain from those same declines, thus seeking to moderate the decline in the portfolio position's value. Such hedging transactions also limit the opportunity for gain if the value of the portfolio position should increase. For a variety of reasons, the Adviser may not seek to establish a perfect correlation between such hedging instruments and the portfolio holdings being hedged. Such imperfect correlation may prevent the Fund from achieving the intended hedge or expose the Fund to risk of loss. In addition, it is not possible to hedge fully or perfectly against any risk, and hedging entails its own costs. The Adviser may determine, in its sole discretion, not to hedge against certain risks and certain risks may exist that cannot be hedged. Furthermore, the Adviser may not anticipate a particular risk so as to hedge against it effectively. Hedging transactions also limit the opportunity for gain if the value of a hedged portfolio position should increase.

- *Index Risk.* If a derivative or ETF is linked to the performance of an index, it will be subject to the risks associated with changes in that index. If the index changes, the Fund could receive lower interest payments or experience a reduction in the value of the derivative or ETF to below what the Fund paid. Certain indexed securities, including inverse securities (which move in an opposite direction to the index), may create leverage, to the extent that they increase or decrease in value at a rate that is a multiple of the changes in the applicable index.

- *Investment Companies and Exchange-Traded Funds (“ETFs”) Risk.* When the Fund invests in other investment companies, including ETFs, it will bear additional expenses based on its pro rata share of the other investment company’s or ETF’s operating expenses, including the potential duplication of management fees. In addition, the risk of owning shares of another investment company or an ETF generally reflects the risks of owning the underlying investments such investment company or ETF holds. The Fund also will incur brokerage costs when it purchases and sells ETFs. In addition, the market value of ETF shares may differ from their net asset value. This difference in price may be due to the fact that the supply and demand in the market for fund shares at any point in time is not always identical to the supply and demand in the market for the underlying basket of securities. Accordingly, there may be times when ETF shares trade at a premium or discount to net asset value.
- *Issuer-Specific Risk.* The value of a specific security or option can be more volatile than the market as a whole and may perform worse than the market as a whole. The value of large cap securities, as represented by the S&P 500 Index, can be more volatile than smaller cap securities due to differing market reactions to adverse issuer, political, regulatory, market, or economic developments.
- *Management Risk.* The net asset value of the Fund changes daily based on the performance of the securities and derivatives in which it invests. The Adviser’s judgments about the attractiveness, value and potential appreciation of particular securities and derivatives in which the Fund invests may prove to be incorrect and may not produce the desired results.
- *Market Risk.* Overall equity market risk, including volatility, may affect the value of individual instruments in which the Fund invests. Factors such as domestic and foreign (non-U.S.) economic growth and market conditions, interest rate levels, and political events affect the securities markets. When the value of the Fund’s investments goes down, your investment in the Fund decreases in value and you could lose money.
- *Market Events Risk.* There has been increased volatility, depressed valuations, decreased liquidity and heightened uncertainty in the financial markets during the past several years. These conditions may continue, recur, worsen or spread. The U.S. government and the Federal Reserve, as well as certain foreign governments and central banks, have taken steps to support financial markets, including by keeping interest rates at historically low levels. This and other government intervention may not work as intended, particularly if the efforts are perceived by investors as being unlikely to achieve the desired results. The U.S. government and the Federal Reserve have recently reduced market support activities. Further reduction, including interest rate increases, could negatively affect financial markets generally, increase market volatility and reduce the value and liquidity of securities in which the Fund invests. Policy and legislative changes in the United States and in other countries may also continue to contribute to decreased liquidity and increased volatility in the financial markets. The impact of these changes on the markets, and the practical implications for market participants, may not be fully known for some time.
- *Model Risk.* The risk that the model used in making investment allocation decisions may result in a decline in the value of the Fund’s shares. While the Adviser continuously reviews and refines the model, if necessary, the model may not adequately take into account certain factors, the data used in the model may be inaccurate, or the computer programming used to create the model might contain one or more errors.
- *Portfolio Turnover Risk.* The Fund may experience high portfolio turnover, including investments made on a shorter-term basis, which may lead to increased Fund expenses that may result in lower investment returns. High portfolio turnover may also result in higher short-term capital gains taxable to shareholders.
- *Securities Lending Risk.* The Fund may seek to increase its income by lending portfolio securities to institutions, such as banks and certain broker-dealers. Portfolio security loans are secured continuously by collateral maintained on a current basis at an amount equal to at least 102% of the current market value of the loaned domestic securities (105% of loaned foreign securities) by marking to market daily. The value of the securities loaned by the Fund will not exceed 331/3% of the value of the Fund’s total assets. The Fund may experience a loss or delay in the recovery of its securities if the borrowing institution breaches its agreement with the Fund. Any gain or loss in the market price of the securities loaned that might occur during the term of the loan would be for the account of the Fund.
- *Short Selling Risk.* The Fund will engage in short selling and short position derivative activities using options, which are significantly different from the investment activities commonly associated with conservative stock funds. Positions in shorted equity securities and derivatives are speculative and more risky than “long” positions (purchases) because the cost of the replacement equity security or derivative is unknown. Therefore, the potential loss on an uncovered short is unlimited, whereas the potential loss on long positions is limited to the original purchase price. You should be aware that any strategy that includes selling equity securities short could suffer significant losses. Shorting will also result in higher transaction costs (such as interest and dividends), which reduce the Fund’s return, and may result in higher taxes.
- *Small-Cap and Mid-Cap Risk.* The risk that the value of securities issued by small-capitalization and mid-capitalization companies may be more vulnerable than larger, more established organizations to adverse business or economic developments. The securities issued by small-capitalization and mid-capitalization companies may go up or down, sometimes rapidly and unpredictably, due to narrow markets and limited product lines, managerial and financial resources.
- *Value Investing Risk.* Value investing attempts to identify securities selling at a discount in comparison to the Adviser’s assessments of their intrinsic value. Such securities may not increase in price as anticipated by the Adviser, and may even decline further in value if other investors fail to recognize the issuer’s value or if the events or factors that the Adviser believes will increase a security’s market value do not occur. Value investing is subject to the risk that an issuer’s intrinsic value may never be fully realized by the market or that an issuer judged by the Adviser to be undervalued may actually be

appropriately priced. Additionally, such securities may decline in value in the short- or long-term even though they are deemed by the Fund to be undervalued. Over time, a value investing style may go in and out of favor, causing the Fund to sometimes underperform other equity funds that use different investing styles.

- *Valuation Risk.* The sale price the Fund could receive for a security may differ from the Fund's valuation of the security, particularly for securities that trade in low volume or volatile markets, or that are valued using a fair value methodology. Because portfolio securities of the Fund may be traded on non-U.S. exchanges may be open on days when the Fund does not price its shares, the value of the securities in the Fund's portfolio may change on days when shareholders will not be able to purchase or sell the Fund's shares.

**Portfolio Holdings Disclosure:** A description of the Fund's policies regarding the release of portfolio holdings information is available in the Fund's SAI. Shareholders may request portfolio holdings schedules at no charge by calling 1-844-GO-RAILX (1-844-467-2459).

### **Changes of Investment Policies**

In accordance with Rule 35d-1 under the 1940 Act, the Fund has adopted an investment policy that it will, under normal circumstances, invest at least 80% of the value of its net assets (plus any borrowings for investment purposes) in the type of investments suggested by the Fund's name. This requirement is applied at the time of investment. This investment policy may be changed at any time by the Fund's Board of Trustees on 60 days' prior written notice to shareholders.

## **MANAGEMENT**

---

### **Investment Adviser**

IronHorse Capital LLC ("IronHorse" or the "Adviser"), with principal offices at 3102 West End Avenue, Suite 400 Nashville, TN 37203, serves as the investment adviser for the Fund. IronHorse has been in business since 2009 and is a wholly-owned subsidiary of IronHorse Holdings LLC, which is directly owned by Harrison Kerr Tigrett and Charles Albert Cunningham III. In addition to advising the Fund, IronHorse provides investment advisory services to separately managed accounts which consist of global mid to large cap equities, primarily focusing on investments in developed regions and markets. Subject to the supervision of the Fund's Board of Trustees, the Adviser is responsible for managing the Fund's investments, executing transactions and providing related administrative services and facilities under an Investment Advisory Agreement between the Fund and the Adviser. As of December 31, 2016, the Adviser had approximately \$54 million in assets under management.

The Adviser has entered into an advisory agreement with the Fund, whereby the Adviser is entitled to receive an annual fee equal to 1.25% of the Fund's average daily net assets. For the fiscal year ended October 31, 2016, the aggregate fee paid to the Adviser was 1.20% of the Fund's average daily net assets. In addition to investment advisory fees, the Fund pays other expenses including costs incurred in connection with the maintenance of its securities law registration, printing and mailing prospectuses and Statements of Additional Information to shareholders, certain financial accounting services, taxes or governmental fees, custodial, transfer and shareholder servicing agent costs, expenses of outside counsel and independent accountants, preparation of shareholder reports and expenses of trustee and shareholders meetings.

A discussion regarding the basis for the Board of Trustees' approval of the Investment Advisory Agreement is available in the Fund's annual shareholder report dated October 31, 2016.

The Adviser has contractually agreed to reduce the Fund's fees and/or absorb expenses of the Fund until at least March 1, 2018 to ensure that total annual Fund operating expenses (exclusive of any front-end or contingent deferred loads; brokerage fees and commissions; expenses of other investment companies in which the Fund may invest ("acquired fund fees and expenses"); borrowing costs, such as interest and dividend expense on securities sold short; taxes; and extraordinary expenses, such as litigation expenses) do not exceed 2.15%, 2.90% and 1.90% for Class A, Class C and Class I shares, respectively. This agreement may be terminated by the Fund's Board of Trustees on 60 days' written notice to the Adviser. These expense reimbursements are subject to possible recoupment from the Fund in future years on a rolling three-year basis (within three years after the fees have been waived or reimbursed) if such recoupment can be achieved within the foregoing expense limits.

### **Portfolio Manager**

*Charles Albert Cunningham, III, CFA*

Mr. Cunningham has served as Chief Investment Officer of IronHorse since November 2009 and is a member of IronHorse's investment committee. Prior to joining IronHorse, he served as Senior Research Associate for Dunavant Capital Management from June 2007 to November 2009. Mr. Cunningham holds an M.B.A. in Finance from Vanderbilt University and a B.A. in Political Science from University of the South. He is a CFA Charterholder.

The Fund's Statement of Additional Information ("SAI") provides additional information about the Portfolio Manager's compensation, other accounts managed by the Portfolio Manager, and the Portfolio Manager's ownership of securities in the Fund.

## HOW SHARES ARE PRICED

---

The net asset value (“NAV”) and offering price (NAV plus any applicable sales charges) of each class of shares is determined at 4:00 p.m. (Eastern Time) on each day the New York Stock Exchange (“NYSE”) is open for business. NAV is computed by determining, on a per class basis, the aggregate market value of all assets of the Fund, less its liabilities, divided by the total number of shares outstanding ((assets liabilities)/number of shares = NAV). The NYSE is closed on weekends and New Year’s Day, Martin Luther King, Jr. Day, Presidents’ Day, Good Friday, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day. The NAV takes into account, on a per class basis, the expenses and fees of the Fund, including management, administration, and distribution fees, which are accrued daily. The determination of NAV for a share class for a particular day is applicable to all applications for the purchase of shares, as well as all requests for the redemption of shares, received by the Fund (or an authorized broker or agent, or its authorized designee) before the close of trading on the NYSE on that day.

Generally, the Fund’s domestic securities (including underlying ETFs which hold portfolio securities primarily listed on foreign (non-U.S.) exchanges) are valued each day at the last quoted sales price on each security’s primary exchange. Securities traded or dealt in upon one or more securities exchanges for which market quotations are readily available and not subject to restrictions against resale shall be valued at the last quoted sales price on the primary exchange or, in the absence of a sale on the primary exchange, at the mean between the current bid and ask prices on such exchange. Securities primarily traded in the National Association of Securities Dealers’ Automated Quotation System (“NASDAQ”) National Market System for which market quotations are readily available shall be valued using the NASDAQ Official Closing Price. If market quotations are not readily available, securities will be valued at their fair market value as determined in good faith by the Fund’s Fair Valuation Committee in accordance with procedures approved by the Board and as further described below.

The Fund will use an independent pricing service (“Pricing Service”) to calculate the fair market value of the Fund’s foreign equity securities on a daily basis by applying valuation factors to the last sale price or the mean price as noted above. The fair market values supplied by the Pricing Service will generally reflect market trading that occurs after the close of the applicable foreign markets of comparable securities or the value of other instruments that have a strong correlation to the fair-valued securities. The Pricing Service will also take into account the current relevant currency exchange rate. A security that is fair valued may be valued at a price higher or lower than actual market quotations or the value determined by other funds using their own fair valuation procedures. Because foreign securities may trade on days when Fund shares are not priced, the value of securities held by the Fund can change on days when Fund shares cannot be redeemed or purchased. In the event that a foreign security’s market quotations are not readily available or are deemed unreliable (for reasons other than because the foreign exchange on which it trades closed before the Fund’s calculation of NAV), the security will be valued at its fair market value as determined in good faith by the Fund’s Fair Valuation Committee in accordance with procedures approved by the Board as discussed below. Without fair valuation, it is possible that short-term traders could take advantage of the arbitrage opportunity and dilute the NAV of long-term investors. Fair valuation of the Fund’s portfolio securities can serve to reduce arbitrage opportunities available to short-term traders, but there is no assurance that it will prevent dilution of the Fund’s NAV by short-term traders. In addition, because the Fund may invest in underlying ETFs which hold portfolio securities primarily listed on foreign (non-U.S.) exchanges, and these exchanges may trade on weekends or other days when the underlying ETFs do not price their shares, the value of these portfolio securities may change on days when you may not be able to buy or sell Fund shares.

Under certain conditions, for example if market quotations are not readily available or believed to be unreliable or trading in a security or securities is halted, securities will be valued at their fair market value as determined in good faith in accordance with the Fund’s valuation procedures adopted by the Board of Trustees in accordance with the 1940 Act and evaluated by the Board as to the reliability of the fair value method used. The valuation procedures also require fair valuation of certain other types of securities, such as illiquid securities. In each of these cases, the Fund’s NAV will reflect certain portfolio securities’ fair value rather than their market price. Fair value pricing involves subjective judgments and it is possible that the fair value determined for a security may differ materially than the value that could be realized if the security were sold. The fair value prices can differ from market prices when they become available or when a price becomes available. Other mutual funds may adjust the prices of their securities by different amounts or assign different fair values than the fair value that the Fund may assign to the same security. Prices of foreign (non-U.S.) securities quoted in foreign (non-U.S.) currencies will be translated into U.S. dollars at current rates. With respect to any portion of the Fund’s assets that are invested in one or more open-end management investment companies registered under the 1940 Act, the Fund’s net asset value is generally calculated based upon the net asset values of those open-end management investment companies, and the prospectuses for these companies explain the circumstances under which those companies will use fair value pricing and the effects of using fair value pricing.

## HOW TO PURCHASE SHARES

**Share Classes:** This Prospectus describes three classes of shares offered by the Fund: Class A, Class C and Class I. The Fund also offers Class Y shares in a separate prospectus. Each class of shares in the fund represents an interest in the same portfolio of investments within the Fund. Refer to the information below to help you make your investment decision. The main differences between each class are sales charges, ongoing fees and minimum investment requirements. In choosing which class of shares to purchase, you should consider which will be most beneficial to you, given the amount of your purchase and the length of time you expect to hold the shares. For information on ongoing distribution fees, see the section entitled **Distribution Fees** in this Prospectus. Each class of shares in the Fund represents an interest in the same portfolio of investments within the Fund. There is no investment minimum on reinvested distributions, and the Fund may change investment minimums at any time. The Fund reserves the right to waive sales charges, as described below. The Fund and the Adviser may each waive investment minimums at their individual discretion. All share classes may not be available for purchase in all states.

### Class A

Class A shares are offered at their public offering price, which is NAV plus the applicable sales charge and is subject to 12b-1 distribution fees of up to 0.25% of the average daily net assets of Class A shares. The minimum initial investment in Class A shares of the Fund is \$2,500 for all accounts. The minimum subsequent investment in Class A shares of the Fund is \$500 for all accounts. The sales charge varies, depending on how much you invest. There are no sales charges on reinvested distributions. The following sales charges, which may be waived in the Adviser's discretion, apply to your purchases of Class A shares of the Fund:

Amount Invested	Sales Charge as a % of Offering Price <sup>(1)</sup>	Sales Charge as a % of Amount Invested	Dealer Reallowance
Under \$25,000	5.75%	6.10%	5.00%
\$25,000 to \$49,999	5.00%	5.26%	4.25%
\$50,000 to \$99,999	4.75%	4.99%	4.00%
\$100,000 to \$249,999	3.75%	3.83%	3.25%
\$250,000 to \$499,999	2.50%	2.56%	2.00%
\$500,000 to \$999,999	2.00%	2.04%	1.75%
\$1,000,000 and above	1.00%	1.01%	1.00%

(1) Offering price includes the front-end sales load. The sales charge you pay may differ slightly from the amount set forth above because of rounding that occurs in the calculation used to determine your sales charge.

### *How to Reduce Your Sales Charge*

You may be eligible to purchase Class A shares at a reduced sales charge. To qualify for these reductions, you must notify the Fund's distributor, Northern Lights Distributors, LLC (the "Distributor"), in writing and supply your account number at the time of purchase. You may combine your purchase with those of your "immediate family" (your spouse and your children under the age of 21) for purposes of determining eligibility. If applicable, you will need to provide the account numbers of your spouse and your minor children as well as the ages of your minor children.

**Rights of Accumulation:** To qualify for the lower sales charge rates that apply to larger purchases of Class A shares, you may combine your new purchases of Class A shares with Class A shares of the Fund that you already own. The applicable initial sales charge for the new purchase is based on the total of your current purchase and the current value of all other Class A shares that you own. The reduced sales charge will apply only to current purchases and must be requested in writing when you buy your shares.

Shares of the Fund are held as follows and cannot be combined with your current purchase for purposes of reduced sales charges:

- Shares held indirectly through financial intermediaries other than your current purchase broker-dealer (for example, a different broker-dealer, a bank, a separate insurance company account or an investment advisor);
- Shares held through an administrator or trustee/custodian of an Employer Sponsored Retirement Plan (for example, a 401(k) plan) other than employer-sponsored IRAs;
- Shares held directly in the Fund account on which the broker-dealer (financial advisor) of record is different than your current purchase broker-dealer.

Letter of Intent: Under a Letter of Intent (“LOI”), you commit to purchase a specified dollar amount of Class A shares of the Fund, with a minimum of \$25,000, during a 13-month period. At your written request, Class A shares purchases made during the previous 90 days may be included. The amount you agree to purchase determines the initial sales charge you pay. If the full-face amount of the LOI is not invested by the end of the 13-month period, your account will be adjusted to the higher initial sales charge level for the amount actually invested. You are not legally bound by the terms of your LOI to purchase the amount of your shares stated in the LOI. The LOI does, however, authorize the Fund to hold in escrow 5% of the total amount you intend to purchase. If you do not complete the total intended purchase at the end of the 13-month period, the Fund’s transfer agent will redeem the necessary portion of the escrowed shares to make up the difference between the reduced rate sales charge (based on the amount you intended to purchase) and the sales charge that would normally apply (based on the actual amount you purchased).

Repurchase of Class A Shares: If you have redeemed Class A shares of the Fund within the past 120 days, you may repurchase an equivalent amount of Class A shares of the Fund at NAV, without the normal front-end sales charge. In effect, this allows you to reacquire shares that you may have had to redeem, without repaying the front-end sales charge. You may exercise this privilege only once and must notify the Fund that you intend to do so in writing. The Fund must receive your purchase order within 120 days of your redemption. Note that if you reacquire shares through separate installments (e.g., through monthly or quarterly repurchases), the sales charge waiver will only apply to those portions of your repurchase order received within 120 days of your redemption.

### *Sales Charge Waivers*

The sales charge on purchases of Class A shares is waived for certain types of investors, including:

- Current and retired directors and officers of any Fund sponsored by the Adviser or any of its subsidiaries, and their families (e.g., spouse, children, mother or father).
- Employees of the Adviser and their families, or any full-time employee or registered representative of the Distributor or of broker-dealers having dealer agreements with the Distributor (a “Selling Broker”) and their immediate families (or any trust, pension, profit sharing or other benefit plan for the benefit of such persons).
- Any full-time employee of a bank, savings and loan, credit union or other financial institution that utilizes a Selling Broker to clear purchases of the Fund’s shares and their immediate families.
- Participants in certain “wrap-fee” or asset allocation programs or other fee-based arrangements sponsored by broker-dealers and other financial institutions that have entered into agreements with the Distributor.
- Clients of financial intermediaries that have entered into arrangements with the Distributor providing for the shares to be used in particular investment products made available to such clients and for which such registered investment advisers may charge a separate fee.
- Institutional investors (which may include bank trust departments and registered investment advisers).
- Any accounts established on behalf of registered investment advisers or their clients by broker-dealers that charge a transaction fee and that have entered into agreements with the Distributor.
- Separate accounts used to fund certain unregistered variable annuity contracts or Section 403(b) or 401(a) or (k) accounts.
- Employer-sponsored retirement or benefit plans with total plan assets in excess of \$5 million where the plan’s investments in the Fund are part of an omnibus account. A minimum initial investment of \$1 million in the Fund is required. The Distributor in its sole discretion may waive these minimum dollar requirements.
- Any government entity that is prohibited from paying a sales charge or commission to purchase mutual fund shares.
- Any purchases by clients of the Adviser or purchases referred through the Adviser.

The Fund does not waive sales charges for the reinvestment of proceeds from the sale of shares of a different fund where those shares were subject to a front-end sales charge (sometimes called an “NAV transfer”). Whether a sales charge waiver is available for your retirement plan or charitable account depends upon the policies and procedures of your intermediary. Please consult your financial adviser for further information.

### **Class C**

Class C shares of the Fund are sold at NAV without an initial sales charge. This means that 100% of your initial investment is placed into shares of the Fund. Under the Fund’s distribution and services plan adopted pursuant to Rule 12b-1 under the 1940 Act, Class C shares pay up to 1.00% on an annualized basis of the average daily net assets as reimbursement or compensation for service and distribution-related activities with respect to the Fund and/or shareholder services. Over time, fees paid under this distribution and service plan will increase the cost of a Class C shareholder’s investment and may cost more than other types of sales charges. The minimum initial investment in Class C shares of the Fund is \$2,500. The minimum subsequent investment in Class C shares of the Fund is \$500.

## Class I

Class I shares of the Fund are sold at NAV without an initial sales charge and are not subject to 12b-1 distribution fees. This means that 100% of your initial investment is placed into shares of the Fund. Class I shares require a minimum initial investment of \$100,000 and the minimum subsequent investment is \$1,000.

Class I shares are available to certain institutional investors, and directly to certain individual investors as set forth below:

- Institutional Investors may include, but are not limited to, corporations, retirement plans, foundations/endowments and investors who purchase through a wrap account offered through a selling group member that enters into a wrap fee program agreement with the Distributor.
- Individual Investors include trustees, officers and employees of the Trust and its affiliates, and immediate family members of all such persons.
- Clients of the Adviser.

For accounts sold through financial intermediaries, it is the primary responsibility of the financial intermediary to ensure compliance with eligibility requirements such as investor type and investment minimums.

**Factors to Consider When Choosing a Share Class:** When deciding which class of shares to purchase, you should consider your investment goals, present and future amounts you may invest in the Fund, and the length of time you intend to hold your shares. To help you make a determination as to which class of shares to buy, please refer back to the examples of the Fund's expenses over time in the **Fees and Expenses of the Fund** section for the Fund in this Prospectus. You also may wish to consult with your financial adviser for advice with regard to which share class would be most appropriate for you.

**Purchasing Shares:** You may purchase shares of the Fund by sending a completed application form (the "Application") to the following address:

***Regular/Express/Overnight Mail***  
Conductor Global Equity Value Fund  
c/o Gemini Fund Services, LLC  
17605 Wright Street, Suite 2  
Omaha, Nebraska 68130

The USA PATRIOT Act requires financial institutions, including the Fund, to adopt certain policies and programs to prevent money-laundering activities, including procedures to verify the identity of customers opening new accounts. As requested on the Application, you should supply your full name, date of birth, social security number and permanent street address. Mailing addresses containing a P.O. Box will not be accepted. This information will assist the Fund in verifying your identity. Until such verification is made, the Fund may temporarily limit additional share purchases. In addition, the Fund may limit additional share purchases or close an account if it is unable to verify a shareholder's identity. As required by law, the Fund may employ various procedures, such as comparing the information to fraud databases or requesting additional information or documentation from you, to ensure that the information supplied by you is correct.

**Purchase through Brokers:** You may invest in the Fund through brokers or agents who have entered into selling agreements with the Fund's distributor. The brokers and agents are authorized to receive purchase and redemption orders on behalf of the Fund. Such brokers are authorized to designate other intermediaries to receive purchase and redemption orders on the Funds' behalf. The Fund will be deemed to have received a purchase or redemption order when an authorized broker or its designee receives the order. The broker or agent may set their own initial and subsequent investment minimums. If you use a broker or agent to buy or redeem shares of the Fund, you may be charged transaction fees or other fees that are in addition to any fees described in this Prospectus. Contact your broker or agent for more information. Finally, various servicing agents use procedures and impose restrictions that may be in addition to, or different from those applicable to investors purchasing shares directly from the Fund. You should carefully read the program materials provided to you by your servicing agent.

**Purchase by Wire:** If you wish to wire money to make an investment in the Fund, please call the Fund at 1-844-GO-RAILX (1-844-467-2459) for wiring instructions and to notify the Fund that a wire transfer is coming. Any commercial bank can transfer same-day funds via wire. The Fund will normally accept wired funds for investment on the day received if they are received by the Fund's designated bank before the close of regular trading on the NYSE. Your bank may charge you a fee for wiring same-day funds.

**Automatic Investment Plan:** You may participate in the Fund's Automatic Investment Plan, an investment plan that automatically moves money from your bank account and invests it in the Fund through the use of electronic funds transfers or automatic bank drafts. You may elect to make subsequent investments by transfers of a minimum of \$100 on specified days of each month into your established Fund account. Please contact the Fund at 1-844-GO-RAILX (1-844-467-2459) for more information about the Fund's Automatic Investment Plan.

**Minimum and Additional Investment Amounts:** The minimum initial investment for Class A and Class C shares is \$2,500 and \$100,000 for Class I shares. The minimum additional investment for Class A and Class C shares is \$500 and \$1,000 for Class I shares. There is no minimum investment requirement when you are buying shares by reinvesting dividends and distributions from the Fund. The Fund reserves the right to waive any investment minimum requirement. These minimum investment requirements do not apply to investors who purchase shares through certain advisory programs offered by financial intermediaries. Investors purchasing shares through these programs should consult their financial intermediary for information about any minimum investment requirements.

The Fund, however, reserves the right, in its sole discretion, to reject any application to purchase shares. Applications will not be accepted unless they are accompanied by a check drawn on a U.S. bank, thrift institutions, or credit union in U.S. funds for the full amount of the shares to be purchased. After you open an account, you may purchase additional shares by sending a check together with written instructions stating the name(s) on the account and the account number, to the above address. Make all checks payable to the Fund. The Fund will not accept payment in cash, including cashier's checks or money orders. Also, to prevent check fraud, the Fund will not accept third party checks, U.S. Treasury checks, credit card checks or starter checks for the purchase of shares.

*Note:* Gemini Fund Services, LLC, the Fund's transfer agent, will charge a \$25 fee against a shareholder's account, in addition to any loss sustained by the Fund, for any check returned to the transfer agent for insufficient funds.

**When Order is Processed:** All shares will be purchased at the NAV per share (plus applicable sales charges, if any) next determined after the Fund receives your application or request in good order. All requests received in good order by the Fund before 4:00 p.m. (Eastern time) will be processed on that same day. Requests received after 4:00 p.m. (Eastern time) will be processed on the next business day.

**Good Order:** When making a purchase request, make sure your request is in good order. "Good order" means your purchase request includes:

- the name of the Fund;
- the dollar amount of shares to be purchased;
- a completed purchase application or investment stub; and
- check payable to the "Conductor Global Equity Value Fund."

**Retirement Plans:** You may purchase shares of the Fund for your individual retirement plans. Please call the Fund at 1-844-GO-RAILX (1-844-467-2459) for the most current listing and appropriate disclosure documentation on how to open a retirement account.

## HOW TO REDEEM SHARES

---

**Redeeming Shares:** If you hold shares directly through an account with the Fund, you may redeem all or any portion of the shares credited to your account by submitting a written request for redemption to:

***Regular/Express/Overnight Mail***  
Conductor Global Equity Value Fund  
c/o Gemini Fund Services, LLC  
17605 Wright Street, Suite 2  
Omaha, Nebraska 68130

*Redemptions by Telephone:* The telephone redemption privilege is automatically available to all new accounts except retirement accounts. If you do not want the telephone redemption privilege, you must indicate this in the appropriate area on your account application or you must write to the Fund and instruct it to remove this privilege from your account. The proceeds, which are equal to number of shares times NAV less any applicable deferred sales charges or redemption fees, will be sent by mail to the address designated on your account or sent electronically, via ACH or wire, directly to your existing account in a bank or brokerage firm in the United States as designated on your application. To redeem by telephone, call 1-844-GO-RAILX (1-844-467-2459). The redemption proceeds normally will be sent by mail or electronically within three business days after receipt of your telephone instructions. IRA accounts are not redeemable by telephone.

The Fund reserves the right to suspend the telephone redemption privileges with respect to your account if the name(s) or the address on the account has been changed within the previous 30 days. Neither the Fund, the transfer agent, nor their respective affiliates will be liable for complying with telephone instructions they reasonably believe to be genuine or for any loss, damage, cost or expenses in acting on such telephone instructions and you will be required to bear the risk of any such loss. The Fund or the transfer agent, or both, will employ reasonable procedures to determine that telephone instructions are genuine. If the Fund and/or the transfer agent do not employ these procedures, they may be liable to you for losses due to unauthorized or fraudulent instructions. These procedures may include, among others, requiring forms of personal identification prior to acting upon telephone instructions, providing written confirmation of the transactions and/or tape recording telephone instructions.

*Redemptions through Broker:* If shares of the Fund are held by a broker-dealer, financial institution or other servicing agent, you must contact that servicing agent to redeem shares of the Fund. The servicing agent may charge a fee for this service.

*Redemptions by Wire:* You may request that your redemption proceeds be wired directly to your bank account. The Fund's transfer agent imposes a \$15 fee for each wire redemption and deducts the fee directly from your account. Your bank may also impose a fee for the incoming wire.

*Automatic Withdrawal Plan:* If your individual account, IRA or other qualified plan account has a current account value of at least \$10,000, you may participate in the Fund's Automatic Withdrawal Plan, an investment plan that automatically moves money to your bank account from the Fund through the use of electronic funds transfers. You may elect to make subsequent withdrawals by transfers of a minimum of \$100 on specified days of each month into your established bank account. Please contact the Fund at 1-844-GO-RAILX (1-844-467-2459) for more information about the Fund's Automatic Withdrawal Plan.

*Redemptions in Kind:* The Fund reserves the right to honor requests for redemption or repurchase orders made by a shareholder during any 90-day period by making payment in whole or in part in portfolio securities ("redemption in kind") if the amount of such a request is large enough to affect operations (if the request is greater than the lesser of \$250,000 or 1% of the Fund's net assets at the beginning of the 90-day period). The securities will be chosen by the Fund and valued using the same procedures as used in calculating the Fund's NAV. A shareholder may incur transaction expenses in converting these securities to cash.

*When Redemptions are Sent:* Once the Fund receives your redemption request in "good order" as described below, it will issue a check based on the next determined NAV following your redemption request. The redemption proceeds normally will be sent by mail or by wire within three business days after receipt of a request in "good order." If you purchase shares using a check and soon after request a redemption, your redemption proceeds will not be sent until the check used for your purchase has cleared your bank .

**Good Order:** Your redemption request will be processed if it is in "good order." To be in good order, the following conditions must be satisfied:

- The request should be in writing, unless redeeming by telephone, indicating the number of shares or dollar amount to be redeemed;
- The request must identify your account number;
- The request should be signed by you and any other person listed on the account, exactly as the shares are registered; and
- If you request that the redemption proceeds be sent to a person, bank or an address other than that of record or paid to someone other than the record owner(s), or if the address was changed within the last 30 days, or if the proceeds of a requested redemption exceed \$50,000, the signature(s) on the request must be medallion signature guaranteed by an eligible signature guarantor.

**When You Need Medallion Signature Guarantees:** If you wish to change the bank or brokerage account that you have designated on your account, you may do so at any time by writing to the Fund with your signature guaranteed. A medallion signature guarantee assures that a signature is genuine and protects you from unauthorized account transfers. You will need your signature guaranteed if:

- you request a redemption to be made payable to a person not on record with the Fund;
- you request that a redemption be mailed to an address other than that on record with the Fund;
- the proceeds of a requested redemption exceed \$50,000;
- any redemption is transmitted by federal wire transfer to a bank other than the bank of record; or
- your address was changed within 30 days of your redemption request.

Signatures may be guaranteed by any eligible guarantor institution (including banks, brokers and dealers, credit unions, national securities exchanges, registered securities associations, clearing agencies and savings associations). Further documentation will be required to change the designated account if shares are held by a corporation, fiduciary or other organization. *A notary public cannot guarantee signatures.*

**Retirement Plans:** If you own an IRA or other retirement plan, you must indicate on your redemption request whether the Fund should withhold federal income tax. Unless you elect in your redemption request that you do not want to have federal tax withheld, the redemption will be subject to withholding.

**Low Balances:** If at any time your account balance falls below \$2,000 (\$1,000 for retirement accounts), the Fund may notify you that, unless the account is brought up to at least \$2,000 (\$1,000 for retirement accounts) within 30 days of the notice, your account could be closed. After the notice period, the Fund may redeem all of your shares and close your account by sending you a check to the address of record. Your account will not be closed if the account balance drops below \$2,000 (\$1,000 for retirement accounts) due to a decline in NAV.

## **FREQUENT PURCHASES AND REDEMPTIONS OF FUND SHARES**

---

The Fund is intended for long-term investment purposes and not for market timing or excessive short-term trading (“frequent trading”). Frequent trading into and out of the Fund can harm all Fund shareholders by disrupting the Fund’s investment strategies; increasing Fund expenses and brokerage and administrative costs; negatively impacting the Fund’s performance; diluting the value of shares held by long-term shareholders; interfering with the efficient management of the Fund’s portfolio, such as the need to maintain undesirably large cash positions or to buy or sell securities it otherwise would not have bought or sold; causing losses on the sale of investments resulting from the need to sell securities at less favorable prices; and decreasing tax efficiency.

These risks may be greater for the Fund because it invests in foreign (non-U.S.) securities, which are believed to be more susceptible to pricing inefficiencies and time zone arbitrage. Time zone arbitrage may occur because of time zone differences between the foreign (non-U.S.) markets on which the Fund’s non-U.S. portfolio securities trade and the time as of which the Fund’s NAV is calculated. For example, traders engaging in time zone arbitrage may seek to exploit changes in value of the Fund’s portfolio securities that result from events occurring after foreign (non-U.S.) market prices are established, but before calculation of the Funds’ NAV. Arbitrageurs who are successful may dilute the interests of other shareholders by trading shares at prices that do not fully reflect their fair value.

Accordingly, the Fund’s Board has approved policies (the “Excessive Trading Policy”) that seek to curb these disruptive activities while recognizing that shareholders may have a legitimate need to adjust their Fund investments as their financial needs or circumstances change. Although there is no generally applied standard in the marketplace as to what level of trading activity is excessive, the Fund may consider that an investor has violated the Excessive Trading Policy if it determines that an investor sells or exchanges shares within a short period of time after the shares were purchased; an investor enters into a series of transactions that is indicative of an excessive trading pattern or strategy; or the Fund reasonably believes that an investor has engaged in such practices in connection with other mutual funds.

**Trade Activity Monitoring:** The Fund monitors selected trades on a daily basis. Trade activity monitoring may include:

- Reviewing accounts where a purchase and sale occurs within a short period of time;
- Reviewing transaction amount thresholds; and
- Making comparisons against the Funds’ “known offenders” database which contains information about investors who have violated the Excessive Trading Policy.

If the Fund determines that an investor has violated the Excessive Trading Policy, the Fund will temporarily or permanently restrict the account from subsequent purchases (including purchases by exchange). In determining whether to take such actions, the Fund seeks to act in a manner that is consistent with the best interests of Fund shareholders.

Whether or not the Excessive Trading Policy has been violated, the Fund may determine from the amount, frequency, or pattern of purchases and redemptions that a shareholder is engaged in excessive trading that is or could be detrimental to the Fund and its shareholders and that trading restrictions are warranted. The Fund may consider the trading history of accounts under common ownership or control for the purpose of enforcing the Excessive Trading Policy. If the Fund believes that the excessive trading may be for legitimate purposes, the Fund may permit the investor to justify the activity. Transactions placed through the same financial intermediary on an omnibus basis may be deemed part of a group for the purpose of this policy and may be rejected in whole or in part by the Fund.

The Fund or an authorized agent or sub-agent may reject any purchase order (including exchange purchases) by any investor or group of investors indefinitely, with or without prior notice to the investor, for any reason, including, in particular, purchases that are believed to be attributable to excessive traders or are otherwise excessive or potentially disruptive to the Fund. Such purchase orders may be revoked or cancelled by the Fund on the next business day after receipt of the order. Neither the Fund nor the Adviser will be liable for any losses resulting from rejected purchase orders. Additionally, the Fund charges a 1.00% redemption fee on shares sold within 30 days of purchase.

**Financial Intermediaries:** Although the Fund attempts to limit disruptive trading activities and prevent time zone arbitrage, some investors use a variety of strategies to hide their identities and their trading practices. There can be no guarantee that the Fund will be able to identify or limit these activities. Omnibus account arrangements are common forms of holding shares of the Fund. Depending on the portion of Fund shares held through financial intermediaries, excessive trading through such financial intermediaries could adversely affect Fund shareholders. Fund shareholders who invest through Financial Intermediaries should contact the Financial Intermediary regarding its excessive trading policies, which may impose different standards and consequences for excessive trading.

Although the Fund has entered into information sharing agreements with financial intermediaries, which give the Fund the ability to request information regarding the trading activity of beneficial owners and to prohibit further purchases by beneficial owners who violate the Fund's Excessive Trading Policy, the Fund's ability to monitor, detect, and curtail excessive trading through financial intermediaries' accounts may be limited, and there is no guarantee that the Fund will be able to identify shareholders who may have violated the Fund's Excessive Trading Policy. While the Fund expects financial intermediaries to apply either the Fund's or its own Excessive Trading Policy to their customers who invest indirectly in the Fund, the Fund is limited in its ability to monitor the trading activity or enforce the Fund's Excessive Trading Policy with respect to customers of financial intermediaries. For example, should it occur, the Fund may not be able to detect market timing that may be facilitated by financial intermediaries or made difficult to identify in the omnibus accounts used by those intermediaries for aggregated purchases, exchanges and redemptions on behalf of all their customers. More specifically, unless the financial intermediaries have the ability to apply the Fund's Excessive Trading Policy to their customers through such methods as implementing short-term trading limitations or restrictions and monitoring trading activity for what might be market timing, the Fund may not be able to determine whether trading by customers of financial intermediaries is contrary to the Fund's Excessive Trading Policy. Brokers maintaining omnibus accounts with the Fund have agreed to provide shareholder transaction information to the extent known to the broker to the Fund upon request. If the Fund or its transfer agent or shareholder servicing agent suspects there is market timing activity in the account, the Fund will seek full cooperation from the service provider maintaining the account to identify the underlying participant. At the request of the Adviser, the service providers may take immediate action to stop any further short-term trading by such participants.

The Fund reserves the right to reject or restrict purchase requests for any reason, particularly when the shareholder's trading activity suggests that the shareholder may be engaged in market timing or other disruptive trading activities. The Adviser may also bar an investor who has violated these policies (and the investor's financial advisor) from opening new accounts with the Fund.

**Exempt Transactions:** Certain transactions are exempt from the Fund's Excessive Trading Policy:

- Shares purchased through reinvested distributions (dividends and capital gains);
- Shares purchased through an automatic investment plan;
- Shares sold through a systematic withdrawal plan;
- Scheduled retirement plan contributions;
- Required distributions from individual retirement accounts (IRA), pension or other retirement plans, and charitable organizations or endowments;
- IRA transfers of assets, Roth IRA conversions, or IRA recharacterizations;
- Shares purchased through certain "fund of funds" and asset allocation programs;
- Involuntary redemptions, such as those resulting from a shareholder's failure to maintain a minimum investment in the Fund, or to pay shareholder fees; and
- Other types of redemptions as the Adviser or the Trust may determine in special situations and approved by the Trust's Chief Compliance Officer.

The implementation of the Fund's Excessive Trading Policy involves judgments that are inherently subjective and involve some selectivity in their application. The Fund, however, seeks to make judgments that are consistent with the interests of the Fund's shareholders. No matter how the Fund defines excessive trading, other purchases and sales of Fund shares may have adverse effects on the management of the Fund's portfolio and its performance. Additionally, due to the complexity and subjectivity involved in identifying excessive trading and time zone arbitrage and the volume of Fund shareholder transactions, there can be no guarantee that the Fund will be able to identify violations of the Excessive Trading Policy or to reduce or eliminate all detrimental effects of excessive trading.

## **TAX STATUS, DIVIDENDS AND DISTRIBUTIONS**

---

The Fund intends to distribute substantially all of its net investment income and net capital gains annually. Both types of distributions will be reinvested in shares of the Fund unless you elect to receive cash. Dividends from net investment income (including any excess of net short-term capital gain over net long-term capital loss) are taxable to investors as ordinary income, while distributions of net capital gain (the excess of net long-term capital gain over net short-term capital loss) are generally taxable as long-term capital gain, regardless of your holding period for the shares. Because the Fund's income is derived primarily from sources that do not pay "qualified dividend income," dividends from the Fund generally are not expected to qualify for taxation at the long-term capital gain rates available to individuals on qualified dividend income. Any dividends or capital gain distributions you receive from the Fund will normally be taxable to you when made, regardless of whether you reinvest dividends or capital gain distributions or receive them in cash. Certain dividends or distributions declared in October, November or December will be taxed to shareholders as if received in December if they are paid during the following January. Each year the Fund will inform you of the amount and type of your distributions.

When you redeem, sell or exchange Fund shares, you will generally realize a taxable gain or loss (unless you are a tax-exempt investor or your investment is in a qualified retirement account). This gain or loss is measured by the difference between the proceeds of the sale and the tax basis for the shares you sold. (To aid in computing your tax basis, you generally should retain your account statements for the period that you hold shares in the Fund. The Fund (or its administrative agent) is required to report to the IRS and furnish to shareholders the cost basis information for sale transactions of shares purchased on or after January 1, 2012).

An additional 3.8% Medicare tax will be imposed on certain net investment income (including ordinary dividends and capital gain distributions received from the Fund and net gains from redemptions or other taxable dispositions of Fund shares) of U.S. individuals, estates and trusts to the extent that such person's "modified adjusted gross income" (in the case of an individual) or "adjusted gross income" (in the case of an estate or trust) exceeds a threshold amount.

On the account application, you will be asked to certify that your social security number or taxpayer identification number is correct and that you are not subject to backup withholding for failing to report income to the IRS. If you are subject to backup withholding or you did not certify your taxpayer identification number, the IRS requires the Fund to withhold a percentage of any dividend, redemption or exchange proceeds. The Fund reserves the right to reject any application that does not include a certified social security or taxpayer identification number. If you do not have a social security number, you should indicate on the purchase form that your application to obtain a number is pending. The Fund may be required to withhold taxes if a number is not delivered to the Fund within seven days.

The foregoing is only a brief summary of certain federal income tax consequences of investing in the Fund. This summary is not intended to be and should not be construed to be legal or tax advice. You should consult your own tax advisers to determine the tax consequences of owning the Fund's shares.

## DISTRIBUTION OF SHARES

---

**Distributor:** Northern Lights Distributors, LLC, 17605 Wright Street, Omaha, Nebraska 68130, is the distributor for the shares of the Fund. Northern Lights Distributors, LLC is a registered broker-dealer and member of the Financial Industry Regulatory Authority, Inc. (“FINRA”). Shares of the Fund are offered on a continuous basis.

**Distribution Fees:** Each of Class A shares and Class C shares, has adopted a Distribution Plan (“12b-1 Plan” or “Plan”), pursuant to which the Fund may pay the Distributor an annual fee for distribution and shareholder servicing expenses of up to 0.25% of the Fund’s average daily net assets attributable to Class A shares, and up to 1.00% of the Fund’s average daily net assets attributable to Class C shares.

The Distributor and other entities are paid under the Plan for services provided and the expenses borne by the Distributor and others in the distribution of Fund shares, including the payment of commissions for sales of the shares and incentive compensation to and expenses of dealers and others who engage in or support distribution of shares or who service shareholder accounts, including overhead and telephone expenses; printing and distribution of prospectuses and reports used in connection with the offering of the Fund’s shares to other than current shareholders; and preparation, printing and distribution of sales literature and advertising materials. In addition, the Distributor or other entities may utilize fees paid pursuant to the Plan to compensate dealers or other entities for their opportunity costs in advancing such amounts, which compensation would be in the form of a carrying charge on any un-reimbursed expenses.

You should be aware that if you hold your shares for a substantial period of time, you may indirectly pay more than the economic equivalent of the maximum front-end sales charge allowed by FINRA due to the recurring nature of distribution (12b-1) fees.

**Additional Compensation to Financial Intermediaries:** The Distributor, its affiliates, and the Fund’s Adviser may each, at its own expense and out of its own legitimate profits, provide additional cash payments to financial intermediaries who sell shares of the Fund, including affiliates of the Adviser. Financial intermediaries include brokers, financial planners, banks, insurance companies, retirement or 401(k) plan administrators and others. These payments may be in addition to the Rule 12b-1 fees and any sales charges that are disclosed elsewhere in this Prospectus. These payments are generally made to financial intermediaries that provide shareholder or administrative services, or marketing support. Marketing support may include access to sales meetings, sales representatives and financial intermediary management representatives, inclusion of the Fund on a sales list, including a preferred or select sales list, or other sales programs. These payments also may be made as an expense reimbursement in cases where the financial intermediary provides shareholder services to Fund shareholders. The Distributor may, from time to time, provide promotional incentives, including reallowance and/or payment of up to the entire sales charge, to certain investment firms. Such incentives may, at the Distributor’s discretion, be limited to investment firms who allow their individual selling representatives to participate in such additional commissions.

**Householding:** To reduce expenses, the Fund mails only one copy of the prospectus and each annual and semi-annual report to those addresses shared by two or more accounts. If you wish to receive individual copies of these documents, please call the Fund at 1-844-GO-RAILX (1-844-467-2459) on days the Fund is open for business or contact your financial institution. The Fund will begin sending you individual copies thirty days after receiving your request.

## FINANCIAL HIGHLIGHTS

The financial highlights tables are intended to help you understand the Fund's financial performance for the period of the Fund's or share class's operations. Certain information reflects financial results for a single Fund share. The total returns in the tables represent the rate that an investor would have earned (or lost) on an investment in the Fund (assuming reinvestment if all dividends and distributions). This information for the Fund for the year ended October 31, 2016 has been derived from the financial statements audited by Grant Thornton, LLP, whose report, along with the Fund's financial statements and related notes, are included in the Fund's October 31, 2016 annual report, which is available upon request and incorporated by reference in the Statement of Additional Information. The information for the years or periods ended October 31, 2015 and 2014 was audited by the Fund's former independent registered public accounting firm during those periods.

### Per Share Data and Ratios for a Share of Beneficial Interest Outstanding Throughout each Period

	<b>Class A Shares</b>		
	<b>Year Ended October 31, 2016</b>	<b>Year Ended October 31, 2015</b>	<b>Period Ended October 31, 2014 <sup>(1)</sup></b>
Net asset value, beginning of period	\$ 10.20	\$ 9.80	\$ 9.75
Activity from investment operations:			
Net investment income (loss) <sup>(2)</sup>	(0.03)	0.00 <sup>(10)</sup>	(0.01)
Net realized and unrealized gain on investments	0.67	0.40	0.06 <sup>(3)</sup>
Total from investment operations	0.64	0.40	0.05
Net asset value, end of period	\$ 10.84	\$ 10.20	\$ 9.80
Total return <sup>(4)</sup>	6.27%	4.08%	0.51%
Net assets, at end of period (000's)	\$ 1,887	\$ 1,109	\$ 12
Ratio of gross expenses to average net assets <sup>(6)(8)</sup>	2.37%	2.49%	2.51% <sup>(7)</sup>
Ratio of net expenses to average net assets <sup>(8)</sup>	2.14%	2.18%	2.20% <sup>(7)</sup>
Ratio of net investment income (loss) to average net assets <sup>(8)(9)</sup>	(0.33)%	0.02%	(0.22)% <sup>(7)</sup>
Portfolio Turnover Rate	123%	86%	99% <sup>(5)</sup>

(1) The Conductor Global Equity Value Fund Class A commenced investment operations on April 15, 2014.

(2) Per share amounts calculated using the average shares method, which more appropriately presents the per share data for the period.

(3) Realized and unrealized gains per share in this caption are balancing amounts necessary to reconcile the change in net asset value per share for the period, and may not reconcile with the aggregate gains and losses in the statement of operations due to the share transactions for the period.

(4) Total returns are historical and assume changes in share price and reinvestment of dividends and distributions. Total returns for periods less than one year are not annualized. Total returns shown exclude the effect of the maximum applicable sales charges of 5.75% and, if applicable, wire redemption fees. Had the Advisor not waived its fees or reimbursed a portion of the Fund's expenses, the returns would have been lower.

(5) Not annualized.

(6) Represents the ratio of expenses to average net assets absent fee waivers and/or expense reimbursements by the Advisor.

(7) Annualized.

(8) The ratios of expenses and net investment income (loss) to average net assets do not reflect the Fund's proportionate share of income and expenses of underlying investment companies in which the Fund invests.

(9) Recognition of net investment income (loss) by the Fund is affected by the timing of the declaration of the dividends by the underlying investment companies in which the Fund invests.

(10) Amount represents less than \$0.005.

(6) Represents the ratio of expenses to average net assets absent fee waivers and/or expense reimbursements by the Advisor.

(7) Annualized.

(8) The ratios of expenses and net investment income (loss) to average net assets do not reflect the Fund's proportionate share of income and expenses of underlying investment companies in which the Fund invests.

(9) Recognition of net investment income (loss) by the Fund is affected by the timing of the declaration of the dividends by the underlying investment companies in which the Fund invests.

## PRIVACY NOTICE

### FACTS WHAT DOES TWO ROADS SHARED TRUST DO WITH YOUR PERSONAL INFORMATION

**Why?** Financial companies choose how they share your personal information.

Federal law gives consumers the right to limit some but not all sharing. Federal law also requires us to tell you how we collect, share, and protect your personal information. Please read this notice carefully to understand what we do.

**What?** THE TYPES OF PERSONAL INFORMATION WE COLLECT AND SHARE DEPENDS ON THE PRODUCT OR SERVICE THAT YOU HAVE WITH US. THIS INFORMATION CAN INCLUDE:

- Social Security number and income
- Account transactions and transaction history
- Investment experience and purchase history

When you are *no longer* our customer, we continue to share your information as described in this notice.

**How?** All financial companies need to share customers’ personal information to run their everyday business. In the section below, we list the reasons financial companies can share their customers’ personal information; the reason Two Roads Shared Trust chooses to share and whether you can limit this sharing.
